

野洲栗東バイパス事業 工事進捗レポート

令和6年7月

The diagram illustrates the Nakanohashi Bridge project across three municipalities:野洲市 (Nakajima City), 守山市 (Miyama City), and 栗東市 (Kitashirakawa City). The total length of the bridge is 1.90 km, 0.60 km, and 2.20 km respectively for each section. The bridge consists of various spans including 行畠高架橋 (Kōtoku Elevated Bridge), 三上高架橋 (Mitsukoshi Elevated Bridge), 七間場高架橋 (Shichimabashi Elevated Bridge), 野洲川橋 (Nakajima River Bridge), 出庭高架橋 (Shidai Elevated Bridge), 出庭3号高架橋 (Shidai No. 3 Elevated Bridge), 大橋高架橋 (Ohashi Elevated Bridge), 中ノ井川橋 (Nakanohashi Bridge), and 手原高架橋 (Tebara Elevated Bridge). Construction status is indicated by colors: yellow for 未着手 (Not Started), blue for 発注手中 (Under Bidding), red for 施工中 (Under Construction), and black for 完成 (Completed). Specific areas like 'アスベスト撤去' (Asbestos Removal) are also marked.

※アスベスト処分量の増加により、令和7年秋全線開通は遅延するものの、工事工程を精査し、できる限り早期に開通できるよう検討してまいります。
