

Table with 100 columns and 100 rows of numerical data. The table is organized into two main sections: '上段: 浸水深(m)' (Upper section: Water depth in meters) and '下段: [地盤高(T.P.m)]' (Lower section: [Ground level (T.P.m)]). The data consists of a grid of numbers, likely representing depth or elevation measurements at various points. The table is divided into four quadrants by a vertical line at column 50 and a horizontal line at row 50.

例
上段:
浸水深(m)
2.11
[2.61]
下段:
[地盤高(T.P.m)]
