

Table with 100 columns and 100 rows of numerical data. The table is organized into two main sections: '上段: 浸水深(m)' (Upper section: Water depth in meters) and '下段: [地盤高(T.P.M)]' (Lower section: [Ground level (T.P.M)]). Each cell contains a numerical value representing data points for various coordinates.

凡例
上段: 浸水深(m)
下段: [地盤高(T.P.M)]

2.11 [12.61]

0 25 50 75 100 m
